

DID YOU KNOW THAT...?

That Vinfoil organizes a monthly Vinfoil Innovation Day (VID) in cooperation with Grafische Groep Matthys (Turnhout, Belgium). During this day, you have the possibility to see the latest addition to the Vinfoil family, the Optima, in action on a KBA Rapida 106 (6+L).

Also, you will be able to get first hand feedback from Matthys about their experience with the Vinfoil Optima.

Vinfoil Optima 110 lands on KBA 106 at SCHELLING AG Switzerland

At the end of December, Vinfoil has delivered and installed an Optima 110 equipped with: ALUS+ (a fully Automatic Loading and Unloading System), FSC (Foil Shaft Changer) and MFU (Multiple Foil Use: a foil optimization system). The Optima 110 replaced the previous Cold Foil device delivered by one of our competitors.

Mr. Beat Schelling (President of SCHELLING AG) after the installation:

“SCHELLING AG has decided to install and integrate the Vinfoil to the new KBA press Rapida 106. The very easy handling of the Optima as well as the reduction of the foil consumption were two of the main reasons for this decision.

Furthermore, it was very important to have the latest production technology with one of the best price-performance ratios.”

Mr. Vincent van der Heijden (CEO of Vinfoil):

“We are very glad to become a partner of SCHELLING AG. We are sure that our fantastic machine with all its features will bring them a lot of profit and bring the company to a new level of experience with the Cold Foil world.”

SCHELLING AG is an independent, Swiss family-owned company whose history and traditions extend back 140 years, known as a highly specialized, innovative manufacturer of packaging.

The people of Vinfoil are passionate about technology and about what they do. Which is reflected in the entire range of machines, from our Micro, Infigo and of course, our Optima.

The Vinfoil Optima installed at SCHELLING AG on their new KBA Rapida 106
